

WHAT IS THE 'RESPONSIVE PRACTICE'?

FEATURING:

Stephen de Groot

President · Myriad

Consulting · Author ·

International Speaker ·

Change Architect

Responsive Practice (RP) (de Groot, 2015, 2018) is a relationship-based, values-centred, strengths-focused and feedback-informed approach for working with individuals, groups and organizations including youth justice, addictions, mental health, child welfare, education, health, child and youth care, and homelessness.

The Responsive practice has evolved out of the Relationship Based Strengths Approach (de Groot, 2007, 2018) to helping. RP represents a set of simple, practical and profoundly impactful strategies for cultivating and constructing meaningful pathways for healing, strengthening resiliencies, optimizing growth and sustaining positive behaviors change.

The workshop will explore the Foundations of Responsive Practice and you can expect to:

- Learn about the Foundations of Responsive Practice.
- Review and practice a variety of simple and practical strategies for improving outcomes.
- Engage in hands-on and experiential learning activities to deepen your understanding of the material and how to apply it to your unique context and services.
- Discover the key strategies for decreasing client resistance and withdrawal from your services.
- Walk away with new strategies, tools, resources and activities to provide engaging, meaningful and impactful care to the people you serve.
- Look forward to more meaningful work and greater successes with all clients.
